- Transfer to any portable video player

NEW!

Easy Mode screen: Direct conversion & transfer

Web video recorder: Recording is now even easier

For players with TV output: Convert to higher resolutions

Save time: Import MP3/OGG directly without conversion

Even more devices: Also for iPod™ Touch, iPhone™ & Wii™

Movies, photos, and music with you wherever you go!

Why do without top-notch entertainment just because you're on the move? With Movies2go 3 you can experience your favorite movies, photos, slideshows, and music in impressive quality, whenever and wherever you are

For every device

Converts for cell phones, iPod™, PSP™, video players, and much more.

For all media formats

Movies, videos, slideshows, individual photos, and music

For all movie sources:

Video DVD, Internet, TV card, VHS, DV camcorders, etc..

Everything online:

Present your videos in your own personal MAGIX Online Album

NEW! Easy Mode screen

Reduced to the most important features: The new "Easy Mode" screen hides extra editing windows so that you can convert and transfer your videos, photos, and music even faster. It's ideal for everyone who doesn't want to bother editing their videos, but just wants to copy them to their player. Of course, you can always switch to normal mode – one click is all it takes.

NEW! Web video recorder

Would you like to be able to capture videos that you see on the Internet? The new web video recorder from MAGIX can do this easily. The smart screen capturing technology lets you record Internet videos during playback and transfer them to your mobile device after saving as a file. This way, you can record your favorite videos from the Internet and bring them along with you wherever you go. NEW! Now even easier...

NEW! For players with TV out

If you want to present your videos to your family, friends, and acquaintances on TV, MAGIX Movies2go 3 offers this must-have highlight: Videos from mobile players can be strongly pixelated when displayed on large screens, but now you can export them in optimized TV resolution to your mobile device. That way you can play back tiny images on larger screens without any problems!

NEW! Import MP3/OGG directly without conversion!

To help you save time, audio files in MP3 or OGG format can now be imported directly into the program without conversion. Simply import the desired file with a click, select the target device, and start the transfer by clicking "Go". It doesn't get any quicker than that!

NEW! Even more devices

you own a popular new device, like an iPhone™, an iPod™, or a Nintendo®Wii™? With MAGIX Movie2go 3 you're on the safe side. Nearly every trendy new device is supported, even several selected navigation devices, and more are being added to the list all the time. You can even put your own device presets on the Internet or easily download presets created by other users for new devices.

Movies as Flash videos for websites

A video says more than a thousand pictures! With the integrated Online Media Manager in your MAGIX Online Album you can effortlessly integrate your own videos into any HTML web page. Doing this not only enriches your websites, but also multiplies your sales chances on online auctions.

All sources:

MAGIX Movies2go 3 supports not only modern sources like video DVDs, Internet videos, and home DV camcorder recordings, but also VHS recordings and all other video sources. If you are not satisfied with the quality of the recordings, simply use our easy-to-master professional tools to get crystal-clear pictures. Breathe new life into your old recordings. Your most beautiful video memories will always be with you from now on!

For all media formats:

Choose any media: Videos, individual photos, slideshows, and music can all be transferred to your target device. If you like, you can edit and optimize your recordings in full 16:9 widescreen format. If you don't want to edit your media further, simply use our 1-click function. Once you have selected [your device](#) the transfer in the required format takes place completely automatically. Would you like to experience full-length feature films in cinema quality on the go? Copy and transfer copy-protected video DVDs without any prior knowledge from your DVD player – it's the silver screen to go!

For every device:

MAGIX Movies3go 3 supports all video-enabled portable devices: Cell phones, Smartphones, game consoles, navigation devices, and many others. No one can offer more – every device is individually adjustable, and over 100 models already have optimal presets. The transfer of your media, even whole lists of videos, photos, and music takes place by means of a data cable, infrared, Bluetooth or – with the corresponding reading device – a memory card (SD, MMS, etc.). You don't have very much memory on your device? The useful Fit-to-Stick technology automatically lets you adjust the size of your videos so that you can enjoy them at the maximum quality that your storage space allows.

For all formats:

Would you like to export or transfer your videos in a different format? No problem. MAGIX Movies2go 3 exports in all current formats for portable video players. Additionally, countless data formats for photos, audio, and music CDs are supported.
