

Xtreme PhotoStory on CD & DVD Deluxe 7

Experience the most exciting images and videos on TV

MAGIX Xtreme PhotoStory on CD & DVD 7 deluxe makes you the director! Convert your photos and videos into a dazzling & moving TV experience, even in wide-screen format!

The 42-time award winner simply offers more:

TV slideshows with unique DVD menus, professional animations, transitions, and 3D effects. Use your own spoken commentary and exciting background music to complete the project.

Your presentations will become lively multimedia memories, and you can show them online and on mobile players, too!

NEW!

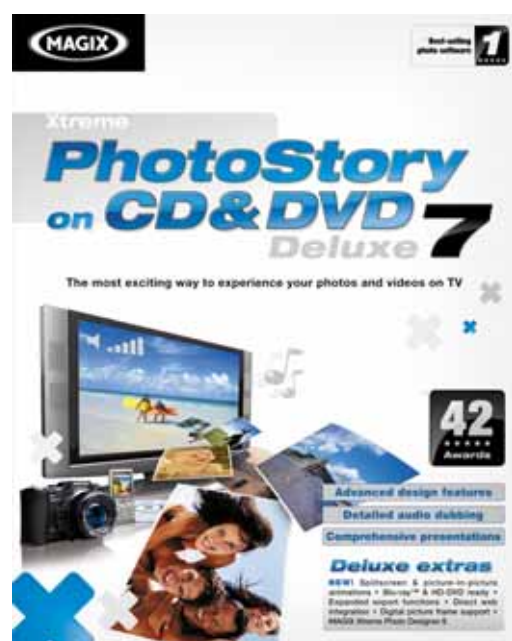

Strong performance with **picture-in-picture animations**, and classics like **splitscreen** and mosaic collages

Supports **digital photo frames** with photos and slideshows including sound

Web integration: Load images, music, and texts directly from the Internet into the project to complete it

Export DVD projects complete with menu as an interactive, **high-resolution slideshow**

Extensive image editing with **MAGIX Xtreme Photo Designer 6**

Design comfortably and with lightning speed using fantastic ideas and templates!

With **MAGIX Xtreme PhotoStory on CD & DVD 7 deluxe** you've chosen the most distinguished software for burning photos to DVD and presenting them on TV.

Get ready for exciting slideshows and experience possibilities you never dreamed of! Fantastic camera movements and zooms, fades, animations and music that fits to any occasion. Create custom masterpieces in no time at all to be viewed on TV or PC, on mobile devices, and the Internet!

1. Select photos & videos

Import your photos and videos from camera phones, digital cameras, memory cards, CDs & DVDs, and most other sources. The import assistant offers a thumbnail preview in record time, automatically recognizes between different media types and helps you during sorting.

2. Add effects & music

Edit your projects yourself or let the software do it automatically for you – you have the choice! Handy task assistants will quickly turn your photos into a cinematic adventure.

3. The result: Memories full of life!

Enjoy the show with your whole family, friends, and neighbors: You can experience your memories once again using a DVD player on TV or on the big screen. Emotion is guaranteed!

Functions in the deluxe version!

Not one pixel too many – HD DVD + Blu-ray™

Your digital camera can contain an unbelievable amount of pixels – 5 million, 6 million, 8 million, and more. Use every pixel for presentation in high-definition format. For your modern TV you can easily burn the slideshow in 16:9 format as a high-resolution **HD-DVD format** on normal blank DVDs.

More: Xtreme PhotoStory on CD & DVD 7 deluxe also supports **Blu-ray™** discs: Burns slideshows as video, archives projects and original files.

The right trailer for your slideshow

Increase the excitement in your slideshows with animated DVD menus using single scenes or still recordings from movies. Just imagine: the software develops an intro video out of your photos which runs as an animated DVD menu automatically in the background. You can create flowing transitions with impressive animations, even in 3D!

NEW! Picture-in-picture animations & splitscreen effects

Picture-in-picture animations can now also be used to pep up DVD menus, especially during the slideshow. With automatically arranged and animated collages made of single images or videos you can create that special "effect classic", like a splitscreen with parallel-running scenes or picture-in-picture compositions like on the news.

NEW! Export DVD projects 1:1 on your PC

Experience your DVD project as an interactive, high-resolution **slideshow in WMV HD format**. With one click you can export your complete disc project with DVD menu for your PC's monitor. The resolution will automatically be adjusted to that of the user's screen as a 1:1 image in excellent quality!

NEW! Digital picture frames

Moving pictures on your shelf or wall are the newest hit! Digital picture frames make it possible, since they play photos and even slideshows with music. **MAGIX Xtreme PhotoStory on CD & DVD 7 deluxe** exports all of your photo collections and slideshows in Motion JPEG format and transfers them directly to the device.

The Internet – A source of inspiration

NEW! In **Xtreme PhotoStory on CD & DVD 7 deluxe** there is an integrated web browser for loading material from the web directly into the disc project. Simply select and copy it directly into the Media Pool automatically with the press of a button. Audio files can be recorded via the analog input on the sound card. The media is immediately available for your use in your own slideshow.

The right sound for every mood: MAGIX Soundtrack Maker

Without music, your slideshow filled with effects is only half done. Music really brings the show into swing, and a real video needs a soundtrack! With **MAGIX Soundtrack Maker** you can give your images more emotion with thematically-styled music in all genres. Individual slideshow segments can be variously accented, from mysterious to cheerful, just as you like.

Sound and image easily optimized

You can optimize every photo and every sound recording. The image optimization ranges from quick optimizations, for example brightness and contrast, to color substitution for creating moody pictures in all shades of color.

Spoken commentary can be noticeably improved through stereo and room simulation effects. Declicker and Dehisser help remove clicks and noises from voiceovers.

Any slideshow as a Flash™ movie

State-of-the-art Flash™ videos offer small file sizes with optimum quality on the web. So that you can embed every one of your slideshows as Flash™ videos into HTML sites in the future, the MAGIX Online Album has an export function for its online Flash™ player. Perfect for embedding a video quickly in personal websites or Internet portals.

NEW! Furthermore, you can now export your slideshows and movies simply as FLV* files without players. This is interesting if you would like to upload your Flash™ video to a community or other Internet portal which already has an integrated player available.

*The plug-in for FLV export is fee-based.

NEW! Automatic panorama functions

Exciting all around: Up to six individual photos can be automatically combined into a great panoramic image. The software takes care of exposure and corrects any lens and perspective distortions. The panorama tool can be used for any other photo montage in order to create exciting widescreen images.

During viewing, a virtual camera movement glides over your widescreen images, so that you can view the photo in detail as a screen-filling impression.

NEW! With **MAGIX Screenshot** it's now possible to share the contents of your screen with other users live over the Internet. Users who install MAGIX Screenshot can see what's happening on the other side.

But that's not enough...

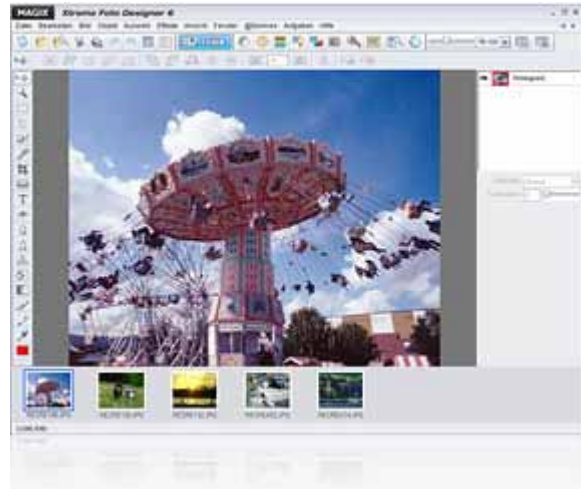

In two steps (after a fee-based registration) it's even possible to remotely access and control the PC of a friend. You can help each other, explain functions actively, edit slideshows together, and much more...

Bonus: Restore photos in detail

Displaying your favorite photo memories the way they should be is worth the effort. For detailed photo editing you also receive **MAGIX Xtreme Photo Designer 6** in the program package. This image editing software supports you with a task assistant which aids with step-by-step instructions and offers the tools you need via quick access.

Clever 1-click tools for exposure and color, redeste correction, and horizontal leveling make editing your photos a snap. Extensive photo jobs like retouch or clone can be taken care of quickly and reliably with typical tools like stamp, blur, magic wand, magnetic lasso, etc. Effect filters can optically restore flaws and be applied to photos to create painting or silkscreen effects. You'll be pleasantly surprised by the excellent image compositions you create!

The deluxe advantages at a glance

NEW! Transfer slideshows with sound to digital picture frames (MJPEG format)

NEW! Create a 100%-true image of a DVD project in WMV HD format including a DVD menu for the PC

NEW! 5 professional picture-in-picture animations for splitscreen effects

NEW! Load Internet content via the integrated web browser directly into the project

NEW! Optional FLV export**

NEW! MAGIX Xtreme Photo Designer 6

Archiving of original photos, slideshows, and projects on Blu-ray Disc™

HD-DVD format on DVDs, TV Showtime DVDs, and multi discs (conventional video DVD, WMV HD disc and project backup onto just one DVD), ondisc editing

Dubbing archive, editable volume progression, MAGIX Soundtrack Maker

Export image sequences as animated graphics for the Internet (animated GIF export), export to mobile end devices, send photo emails, still image recording via video cameras (e.g. web cam)

MAGIX Music Editor 2.0

Advanced functions

Uniquely customize

The Media Pool makes it easier than ever to create individual arrangements: Dynamic camera pans, zooms, and selected decorations add even more life to your optimized photos and videos while giving them your own personalized touch.

- Optimize
- Decorate
- Camera movement
- Rotate
- Transitions

The right style for every occasion: MAGIX MovieShow Maker

Do you mostly take pictures on vacation or on special occasions? We have thought about how you might like to decorate your most beautiful moments, and developed classic and unusual slideshow styles for all important themes, from summer vacation to music video. In combination with your photos, a show can be created in just moments which already have fades, effects, decorations, sounds, and background music, instantaneously turning your photos into a film.

Animated decorative elements

On the Internet you will find countless animated graphics which you can now place as decorative elements in your photos. The size, position, and perspective can be optimally adjusted just like with any decorative elements from our giant Media Pool.

Looking good in any format

Whether horizontal or portrait, your photos fit perfectly into the image flow and will receive the background color and decorations of your choice to avoid black bars.

NEW! Interactive online presentation

A slideshow can also be presented free of charge online with your MAGIX Online Album. Upload functions directly from within the program.

New & unique: Load the disc project's interactive start menu and all slideshows onto the web: the 1:1 image of a DVD on the Internet helps you stay connected around the world with your friends and family.

NEW! Knowledge exchange in the Community

A lot has changed in the **MAGIX Community**, too. Besides the spectacular selection of content and formats which you can use and upload, the community is now even more communicative with the addition of a new platform:

magix.info – **Multimedia Knowledge Community**

The goal here is one of knowledge exchange between users; questions and answers, vis-a-vis showing and discussing, online training, advice on buying, and chatting.

Additional functions

- **NEW!** Intuitive user interface: two color choices with a clear beginner mode
- **NEW!** Automatic panorama functions for creative photo montages
- Fullscreen editing in any format, even for wide-screen laptops
- **NEW!** Noticeably more fluid and quicker performance due to hardware acceleration (dual-core processors, Nvidia graphics cards)
- **NEW!** 3:2 formats (SLR cameras or scans, for example) are now displayed automatically in fullscreen without black edges – depending on show format either as 4:3 or 16:9.
- Import and output of MPEG-4** videos for MP3 and multimedia players.
- Extensive file import and export
- Title editor with endless possibilities: Position, movement, design, 3D effects, **NEW!** finer font resolution
- Magnetic objects & 3D animations: Decorative elements automatically follow movements.
- Sound and image optimization, non-destructive editing
- Timeline mode for detailed arrangement with all sounds and titles
- Bonus: MAGIX Photo Manager 2008, Mufin MusicFinder

Program interface

Well connected: MAGIX products and Online Services from MAGIX

Discover the possibilities of myGOYA, your free online operating system! Every MAGIX product offers a direct and easy-to-use gateway to the world of online multimedia:

- Present your photos, videos, and music directly in your Online Album or in worldwide Internet communities.

- Order brilliant photo prints to be sent directly to your doorstep. It's quick, easy, and well priced.

Experience these and many more online services on www.mygoya.com

All functions at a glance

Import & record

The increased program performance on computers with dual-core processors is impressive. Hardware acceleration produces jitter-free, fluid, fullscreen playback, even with complicated image effects like transitions, crops, position changes, and much more...

Load digital camera photos and videos	Also works with 16:9 photos of modern wide-angle cameras
Import photos from mobiles, photo CD/DVDs, memory cards,	Also supports Kodak® Photo-CD-(PCD) and external drives via USB 1 & 2, serial ports and much more.
Scan in paper prints	Direct TWAIN® scanner connection
Enter spoken comments	Record speech in sync with the images
Automatic format adjustment of 3:2 pictures	New! Display photos in 3:2 format fullscreen without black edges (4:3 or 16:9). Ideal for digital SLR cameras and scanned-in images.

Optimize & improve

Whoever has a laptop now gets more out of their MAGIX software: The program can fill every wide-screen TFT & wide-screen display optimally (16:9, for example). No more wasted space!

1-click picture optimization	Auto exposure, auto color, selective brightness, focus, brightness/contrast, color adjustment, cropping/removal, rotation
Fine tune your photos & movies	Exact picture size, positioning, rotation, mirroring, picture-in-picture
Warning system for picture quality	Guarantees the best resolution for every medium (e.g. TV)
Sound optimization	Prepare background music and spoken commentary: widen stereo, equalizer, noise removal, etc.
Top quality for TV, PC, projector	100% true color, full screen without cut edges or flickering
Intuitive user interface	New! Stylish design (2 color schemes), beginner mode, fills the screen even on widescreen laptops.
Non-destructive editing	Practical and secure: original files stay unchanged

Arrange & create

Slideshows with captions and descriptions increase the excitement and are more fun. If you have fun writing, then get ready to add witty titles and text, because the font images have been greatly improved.

Overview, storyboard, timeline	Easily sort, rotate, arrange, and add sound to every photo
Automatic MovieShow Maker	15 styles for great slideshows with rhythmic picture changes
Media Pool	Import all photos and videos in a flash, enhance them, add titles and effects (zooms, camera pans, transitions)

Decorations	100 elements and animations (comics, frames, etc.)
Automatic panoramas	New! Panorama functions for creative photo montages include focal distance recognition, and for observation of wide-format images a camera pan glides over the screen.
Enhance portrait photos	Avoid black bars, create your own backgrounds, colors, creative effects, and much more
1-click animations	Bring single photos to life (optical and color effects)
Transition effects	70 templates: picture-in-picture, 3D power effects, and much more
Video effects & camera pans	30 templates for special FX, zooms, and panorama pans
Title generator	IMPROVED! Razor-sharp texts with 30 templates (for example, flowing credits, subtitles)
MAGIX Soundtrack Maker	Creates unique background music mood changes to match your individual pictures (fun, exciting, cool, and many more)
Themed background music	Included in the program: Background music in various genres, fitting songs for parties and festivities.
Faster performance	New! Hardware accelerator increases performance to produce smooth full screen display
Burn & present	
The burning assistant puts your project on DVD without any detours. The complete format settings of your slideshow are automatically applied, the decoder settings are predefined and create the best-possible results for high-quality images and jitter-free movements in any resolution.	
Interactive DVD menus (04:03 and 16:09)	75 individually customizable templates with intros, backgrounds (video/music), animations, and much more, including real-time preview
Menus from your own images	10 templates for DVD menus using motifs from your slideshow images (3D animations, flowing introductory transitions, and much more)
Burn slideshows for the TV	Burn Wizard for all disc types (DVD, SVCD, miniDVD, and more)
Photo CD/DVD ROMs	Secure photo archives, comes with PC player software on disc
Universal data burn module	For slideshow disc copies, project backups, etc.
Double-layer DVDs	For even longer and even more slideshows per disc
Present DVD image online	New! Present mixed-media albums (photos, videos, music) with a menu just like on a DVD
MAGIX Screenshare	New! Show screen contents on other PCs via the Internet. Ideal for personal communication and for helping each other.
magix.info - MAGIX Community	New! Share your knowledge with other MAGIX users who share your interests
