

LAVASOFT

Ad-Aware® BUSINESS EDITION

anti-virus + anti-spyware

Anti-Virus + Anti-Spyware for Endpoint Malware Protection

Undetected malware on corporate computers can lead to theft of confidential data, network corruption, drained system resources, and considerable financial damage due to loss of valuable working time. With the nature of today's malware threats, businesses need advanced workstation solutions in place to prevent the risks that insufficient security brings. Lavasoft, the makers of industry-leading Ad-Aware anti-malware, are introducing an innovative new solution for today's companies in need of effectively protecting their network computers, without sacrificing limited budgets or straining IT infrastructures.

Ad-Aware Business Edition combines the powerful protection and efficiency of Ad-Aware Pro with a central, easy-to-use management tool. Proactively defend corporate data with maximum security against viruses, malware and spyware – allowing your IT professionals to centrally administer, protect and control the security of workstations in your company's network.

Powerful Detection, Advanced Protection, Top Efficiency – All with Centralized Management

COMPREHENSIVE MALWARE PROTECTION

- Secure business PCs with an advanced, comprehensive defense against malware, spyware, viruses, worms, and more with Ad-Aware's Extensive Detection Database of over 2 million known threats, along with continuous pulse updates to guard against new attacks.
- Behavior-based heuristical detection means unknown and emerging threats are found and blocked.
- Integrated, proactive protection of Ad-Watch Live! Expert immediately detects malware applications with real-time registry, process, and network protection.
 - Real-time process protection – Suspend suspicious files and block malicious processes to prevent further system integration.
 - Real-time registry protection – Detect and block access to attempted registry changes, a favorite malware target.
 - Real-time network protection – Monitor outgoing network traffic and block connections to blacklisted IP addresses and known malicious websites to identify and stop active threats.
- Advanced anti-rootkit technology and removal system protects against hidden threats and stealth attacks.
- External drive scanning allows clients to scan external storage devices, DVDs, USBs, or any other drives connected to their PCs for an additional method of mitigating threats.

KEY FEATURES

- Centrally managed anti-virus and anti-spyware protection
- High performance, low resource impact
- Powerful Ad-Aware Pro core engine
- Easy-to-use management tool for IT admins
- Real-time protection against viruses, spyware, rootkits, and more
- Behavior-based heuristical detection
- Rootkit removal system
- Detailed, on demand reports
- Customize automated updates and scheduling of tasks
- Remote installation, licensing and maintenance
- Priority technical support

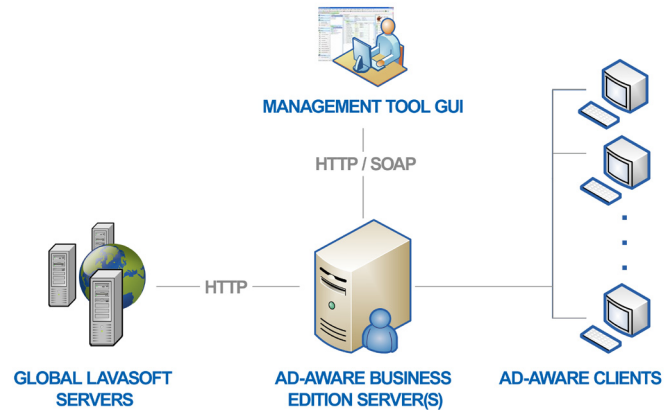

CENTRALIZED, FLEXIBLE CLIENT MANAGEMENT

- Central, network-wide client management means the IT admin manages policies and tasks using existing Active Directory setup for easy and adaptable control. With remote installation, licensing and maintenance, the Business Edition's infrastructure assigns and maintains client licenses, removing the burden from IT admins.
- Flexible client management means you can view, assign, or modify policies, tasks, and reports for an organizational unit or single computer.
- Centrally define and configure policies for all clients, or groups of clients, with the ability to lock some or all policies in order to prevent accidental changes.
- Customize automated tasks – thereby optimizing time and resources – by scheduling routine scans, updates, and reporting options to fit the needs of your business.

EASY INSTALLATION, FAST CONFIGURATION, & INTUITIVE USE

- Easily install and deploy new clients using standard Windows Active Directory. Frequent synchronization with Active Directory ensures smooth operation.
- Simplify installment of the server through preconfigured default settings.
- Scalability means our technology adapts to your requirements and load environments, from small businesses with 25 workstations up to large enterprises with over 100,000 client machines.
- Secure the entire business network with ease by protecting client workstations, as well as remote workers or employees on the road travelling with corporate laptops.
- Receive immediate answers to questions with priority online customer support, so you can focus on your business, while we concentrate on your security.

HIGH PERFORMANCE – LOW RESOURCE USE

- Tread lightly on workstation and network resources with the radically improved resource efficiency of Ad-Aware Pro, optimal for businesses that require advanced security without impacting system performance.
- Optimize resources by setting up download servers so all updates are distributed through the internal network, under the IT admin's control.
- Balance the load of large numbers of clients (10,000 +) by easily configuring additional download/application servers.

DETAILED REPORTING FOR NETWORK TRANSPARENCY

- Quickly and easily generate on-demand reports to regularly monitor statistics.
- Capture detailed data (scan logs, threat occurrences, etc.) to a single database; export to Excel in order to further analyze statistics.
- Comprehensive reports allow IT admins a quick overview of network health in order to identify security trends and take the necessary steps to remediate threat sources.

SYSTEM REQUIREMENTS

Client (end-point)

- **Processor:** Intel Pentium 600 MHz or better
- **RAM:** Operating system + min 100 MB
- **Free hard disk space:** 100 MB recommended
- **Operating Systems:** Windows Vista (32 and 64-bit), Windows XP (32-bit), Windows 2000 Pro

Centralized Management Tool

- **Operating Systems:** Windows Vista (32 and 64 bit), Windows XP (32 bit), Windows 2003 server, Windows 2008 server
- **.NET Runtime 3.5**

Less than 500 computers (Small to Medium Business)

- **Enterprise server**
- **Operating Systems:** Windows Vista (32 and 64 bit), Windows XP (32 bit), Windows 2003 server, Windows 2008 server
- **.NET Runtime 3.5**
- **Microsoft SQL Server 2005 Express**
- **Squid caching proxy server**
- Microsoft SQL Server 2005 Express (free, 4GB RAM/Hard Disk limitation)
- **Processor:** Dual Core 1.66 GHz
- **RAM:** Operating system + 512MB
- **Free hard disk space:** 200MB + Database (up to 4 GB)

500 to 10,000 computers (Medium to Large Enterprise)

- **Operating Systems:** Windows 2003 server, Windows 2008 server
- **.NET Runtime 3.5**
- **Microsoft SQL Server 2005 Standard**
- **Squid caching proxy server**
- **Processor:** Quad Core 1.66 GHz
- **RAM:** 4 GB
- **Free hard disk space:** 50 GB
- **More than 10,000 computers (Large Enterprise)**
- **Multiple Enterprise servers** (~10,000 computers per server)
