Choose the extended package and get it all: more sounds, more effects, more functions! Get started without compromises and take advantage of all of the functions! Find your own personal sound completely without any prior knowledge.

Premium extras!

NEW! BeatBox 2 plus

NEW! 3,500 professional sounds

NEW! Make songs as a team

NEW! Advanced studio functions

- More effects
- Start live acts
- True sound design
- CD mastering, and much more

Make music – without compromises

With MAGIX Music Maker 15 Premium, you now have an exclusive all-around package to create songs that will impress immediately! You can look forward to over 3,500 brand-new sounds that come directly from the studios of internationally successful top producers – get started on your personal music project.

- Professional sound archive • Studio effects • Powerful extras

More sounds, more effects, more possibilities

Thousands of current audio building blocks and effects from the studios of internationally successful producers are waiting to be combined and transformed however you want. Integrate your own recordings or parts of your favorite MP3s. In a short time, your own perfect songs will be ready – in CD quality. And the best part is, it's all so simple that you can get started right away.

NEW! The most direct way to becoming a pro

To make getting started as convenient and comfortable as possible, only the most important sections will be displayed, making the basic principles immediately clear for beginners. And thanks to the new Infobox, you can always learn something along the way. Additional video crash courses can be played directly in the program. The advantage: now everyone can make music completely without any prior knowledge – and learn more about the details as time goes by.

NEW! The sound archive

MAGIX Music Maker 15 Premium provides a massive package of sounds: rock, pop, dance, hip-hop, disco house, techno, chillout, and ambient, plus other special audio material like latin, film music, minimal electro, and much more! Over 3,500 professional sounds offer the ideal basis for your own audio experiments: different musical styles can be easily combined to create something new. The tempo adjusts itself automatically – you'll never be out of sync with the rhythm.

Instruments

Get ready for ultra-realistic instruments which seem just like the real thing on your PC. The practical MIDI editor lets you easily write in your melody ideas. You'll also receive more exciting synthesizers like LiViD, your own personal virtual drummer.

NEW! BeatBox 2 plus

The new Plus version of the popular BeatBox has been developed even further – a flagship among drum computers. Besides the completely new sound engine, numerous options for sound shaping, and high-quality effects, the Plus version of BeatBox 2 offers additional drum kits, full automation of all parameters for exciting sound processes, and an integrated effects section! Tweak your beats however you want!

Effects, mixing, mastering

Use the integrated studio-quality effects to get the most out of your song. Thanks to numerous templates, you can quickly make professional production sound your own.

Use the mixer to specify instrument volume for the perfect harmony and produce the perfect mix. Thanks to the integrated Mastering Suite, you'll be able to create perfect sound like you know from store-bought CDs: brilliant, pumping, and crystal clear!

Record & remix

Of course, you can also mix your own recordings into your songs, too. You can also expand your sound archive with exactly the material that fits with your style by adding your own recordings. No matter whether you sing into the microphone, record instruments, import MP3s, or import songs from CDs, everything can easily be cut, remixed, edited, and enriched with effects!

True sound design

Do you like experimenting with sound? Revolta 2 is the perfect audio laboratory! The high-performance analog synthesizer makes anything possible, from core bass lines to cutting lead sounds to complex sound patterns. Highlight your personal musical style with brand-new sound developments. The video crash course helps you get started right away without any prior knowledge.

NEW! Live on stage

Live Performer helps you produce exciting songs in a completely new way: Play any part of a song via computer or MIDI keyboard and combine them in new ways like a DJ - live and in real time! The new timecode sync even makes it possible to connect two PCs via MIDI and make songs together with friends as a team! External hardware synthesizers and other devices can also be synchronized; everything is on beat with the rhythm. Discover a new kind of producing style developed for clubs and stage performances.

NEW! Publish directly

Your song is great, but nobody knows about it? Just a single click is enough to publish your music on the Internet! For example, you can upload your music project to YouTube™ directly from the program. Make some noise, exchange with others, and meet other fans of your style.

Online extras

Catooh – the Online Content Library is your online sound archive. Whatever it is that you're looking for – drum loops, instruments, vocals, or sound effects – the program provides a direct connection to this giant sound library and supports every one of your song ideas with the right material.

And if you need a special tip, magix.info, the Knowledge Community provides fast and direct answers for all of your questions about producing music: just write your question in the text window and send it off online, and it won't be long until you get the help you want.

MAGIX is the market leader in multimedia software, with over 600 international awards:

Awards refer to different products, versions and countries. More info at www.magix.com

Program interface
