

Music Maker 15

Simply make music – the best way to create your own sound

Produce & publish your own songs

Making music is easy; MAGIX Music Maker 15 offers the easiest start that you could imagine. You can look forward to hearing something very special – your own songs!

Everything you need to get going is included in this unique complete package: thousands of sounds, a mixer, effects, and practical videos which will turn you into a pro in no time. No prior knowledge is required; you can start right away.

NEW!

- BeatBox 2: A newer, more flexible drum computer for your own beats
- Sound archive: Over 1,500 brand-new sounds
- Infobox: Learn about music while you produce it
- Sound Vision: All of your sounds at a glance
- Easy mode: The easiest way to get started
- and much more

www.magix.com

Creating your own sound starts here!

Simply use MAGIX Music Maker 15 to create your own songs! Thousands of audio building blocks and effects from the studios of internationally successful producers are waiting to be combined and transformed however you want. In a short time, your own perfect songs will be ready – in CD quality.

Produce your own songs and publish them

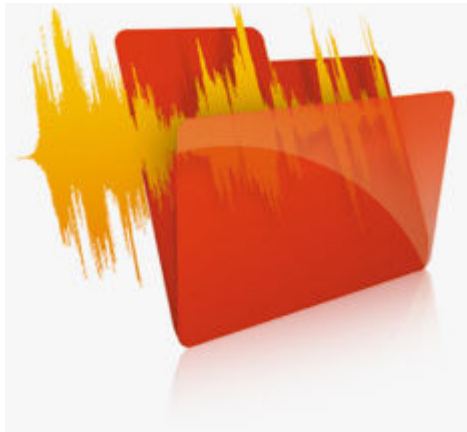

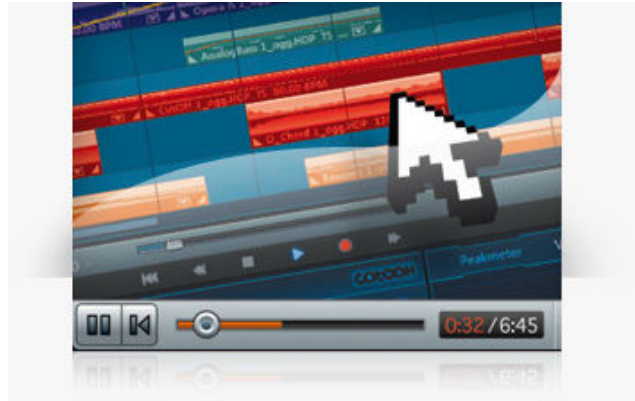

Thousands of current audio building blocks and effects from the studios of internationally successful producers are waiting to be combined and transformed however you want. Integrate your own recordings or parts of your favorite MP3s. In a short time, your own perfect songs will be ready – in CD quality. And the best part is, it's all so simple that you can get started right away.

NEW! The most direct way to becoming a pro

To make getting started as convenient and comfortable as possible, only the most important sections will be displayed, making the basic principles immediately clear for beginners. And thanks to the new Infobox, you can always learn something along the way. Additional video crash courses can be played directly in the program. The advantage: now everyone can make music completely without any prior knowledge – and learn more about the details as time goes by.

NEW! The sound archive

MAGIX Music Maker 15 includes an extensive sound package with rock, pop, dance, hip-hop, disco house, techno, and chillout and ambient material. Over 1,500 professional sounds offer the ideal basis for your own audio experiments: different musical styles can be easily combined to create something new. The tempo adjusts itself automatically – you'll never be out of sync with the rhythm.

Instruments

Get ready for ultra-realistic instruments which seem just like the real thing on your PC. The practical MIDI editor lets you easily write in your melody ideas. You'll also receive more exciting synthesizers like LiViD, your own personal virtual drummer.

NEW! BeatBox 2

The new version of the popular BeatBox wasn't just equipped with a completely new sound engine – now it also offers even more for creating your own grooves. You can look forward to dynamic drum kits, numerous options for shaping sounds, high-quality effects, and much more. It has never been easier to construct complex and multi-layered beats! Try it out...

Effects & mixer

Use the integrated studio-quality effects to get the most out of your song. Thanks to numerous templates, you can quickly make professional production sound your own.

Use the mixer to specify instrument volume for the perfect harmony and produce the perfect mix. Want the drums a little quieter? The bass a little louder? You're in control of the sound.

Record & remix

Of course, you can also mix your own recordings into your songs, too. You can also expand your sound archive with exactly the material that fits with your style by adding your own recordings. No matter whether you sing into the microphone, record instruments, import MP3s, or import songs from CDs, everything can easily be cut, remixed, edited, and enriched with effects!

NEW! Publish directly

Your song is great, but nobody knows about it? Just a single click is enough to publish your music on the Internet! For example, you can upload your music project to YouTube™ directly from the program. Make some noise, exchange with others, and meet other fans of your style.

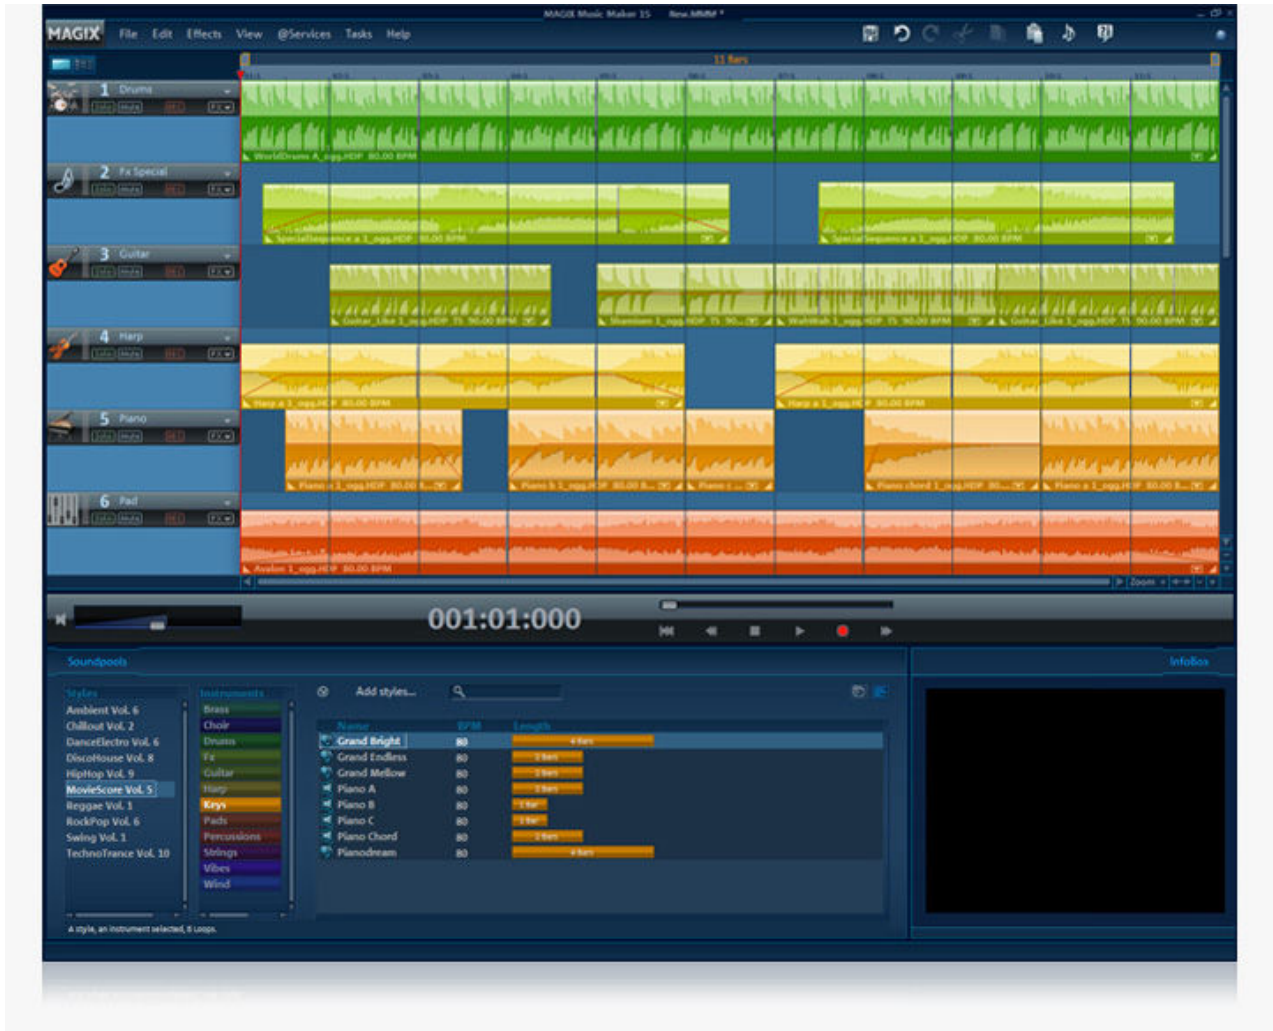

Online extras

Catooh – the Online Content Library is your online sound archive. Whatever it is that you're looking for – drum loops, instruments, vocals, or sound effects – the program provides a direct connection to this giant sound library and supports every one of your song ideas with the right material.

And if you need a special tip, magix.info, the Knowledge Community provides fast and direct answers for all of your questions about producing music: just write your question in the text window and send it off online, and it won't be long until you get the help you want.

Computer Music (UK), no. 122
... it's [Music Maker] actually based on
Magix's high-end SampleLuce sequencer,
and offers some fairly advanced features
for the price, so you won't outgrow it in a
hurry."

Press comments refer to previous versions.

PC Plus (UK), no. 260
"Now this is how to make
the art of music creation
easy."

TechRadar.com (UK), 27.08.2007
Tech tested: 5/5 stars; "Overall this has
been one of the simplest and most intuitive
music creation kits about for the price".
An easy route to musical genius"
